## *Mission Values*

### **1. Trusted Exchange**

Every transaction between members is backed by verifiable credentials and a transparent record, so participants can trade services with confidence rather than hope.

### **2. Verified Expertise**

Member profiles tie real organizations, roles, and professional identities to the services offered, ensuring buyers know who they are working with before any podCOIN changes hands.

### **3. Human Connection**

Through Human Zoom and timed services, the platform prioritizes real face-to-face conversation over purely transactional exchanges, keeping people at the center of the network.

### **4. Transparent Ledger**

Every transaction is recorded and displayable, creating an open, auditable history that builds trust across the community and protects both buyers and sellers.

### **5. Member Sovereignty**

Members own their accounts, their podCOIN balances, and the services they list, giving creators direct control over how they participate, price their work, and engage with others.
